

## Progress by Works Area

Work Area	Vegetation Type	Initial Quality of Area	Priorities, major weed threats	2006	2007	2008	2009	2010	Quality score	% completed
1	New Road Corner Carpark	Very poor, 2/10	Replanting then weeding banks, mulching, Rubbish Removal,	June - Weed, spray, mulch and plant	May - Replant. July - Weed, mulch	April - Weed, mulch	April - Weeding, Spraying, Mulching, Tidying. May - Planting		6	90%
2	Upper degraded grassy slopes, parkland	Poor, 3/10	Replanting. Slashing; Hawthorn, fruit trees, hemlock, blackberries. Cypresses in due course. Pattersons Curse		May - Replant. November - spray/remove Patterson's Curse		September - beside Buckley's Farm track Pittos, Hawthorn, Spanish Heath, Blackberries, Broom.	August - Planted variety (200) indig plants below Car-park next to New Rd fence. September - Hand-pulled 20, 000 Boneseed, plus removed some Broom & Blackberry.	3-7.5	75%
3	Open Woodland, grassy forest,	Medium, 5/10	Replanting trees. Woody weeds – boneseed, pittosporum, Spanish Heath. Pasture grasses, Capeweed, Pattersons Curse	May - Poison/remove Boneseed & Pitto June - Poison/Remove Boneseed & Pitto 6/10	March - Remove fence. Poison Pitto. November - spray/remove Patterson's Curse	July - Target: Sallow Wattle, Pittosporum, Blackberry, Spanish Heath, Boneseed September - Trinity planting,	March - Assault on Spanish Heath next to Echidna Track. Hard yakka, great effort. Continued next to Sarah's Track - Pittos, Hawthorn, Spanish Heath. November - Swept down eastern side of Manna Gum track. Tackled Boneseed, Pittos, Hawthorn etc. An island of woody weeds (Pittos & Spanish Heath) remains.	May - Swept through, hand-pulled Boneseed seedlings, removed small & large Pittos & Hawthorns.	4-8	60%
4	Open Woodland, grassy forest,	Very good, 8/10	Woody weeds – boneseed, pittosporum, pasture grasses, weeds spread from quarry. Pattersons Curse	November - Solarise Kikuyu		September - Kikuyu (spray), Hawthorn, Blackberry, Boneseed, Pittosporum		March - Fanned across slopes removing Boneseed seedlings, Pittos and emerging Blackberries and a few Spanish Heath. Few weeds remain (except grasses on ridge)	8-9	90%

Work Area	Vegetation Type	Initial Quality of Area	Priorities, major weed threats	2006	2007	2008	2009	2010	Quality score	% completed
5	Open Woodland, grassy forest, moist forest on lower slopes	Poor, 3/10	Woody weeds – Boneseed, Pittosporum, Sallow Wattle, Early Black Wattle, pasture grasses	Remove car bodies. November - poison pittos.	June - Poison pitto at bottom of Hill Track	March - Target Sallow Wattle, Boneseed, Pittos September - Trinity: weed pittos	February - Above Wallaby Walk - Most boneseed seedlings removed, pittos cut & dabbed or drilled & filled. Blackberries & Sallow Wattles removed. July - Removal of Boneseed seedlings, Sallow Wattle and Broom.	June - at least 15,000 Boneseed seedlings hand-pulled, 50 Sallow Wattle, 100 Pitto seedlings plus a few blackberries. Huge effort, but still needs work!	3.5-8.5	65%
6	Woodland	Very poor, 2/10	Woody weeds - Pittosporum		April - Widen Serg's track. Poison pitto	November - Pittosporum, Boneseed, Blackberry, Sallow Wattle		June - 50 Lomandra planted	2-6	20%
7	Woodland	Very poor, 2/10	Woody weeds - Pittosporum				June - Assault on Pittos at edge of Glenfern Ridge Track. Huge effort - ready for chipping. September - Chipping of dead pittos etc.	April - In conjunction with YRFM, removed and chipped strip of Pittosporum beside Serg's and Ridge Tracks. 8 tonnes of material removed	2-4	10%
8	Depot Corner	Very poor, 2/10	Pasture Grasses, Replanting then Weeding banks, mulching	June - Weed, spray, mulch and plant. September - poison pittos, burn piles	July - Weed, Mulch.	April - Weed, mulch	April - Weeding, Spraying, Mulching, Tidying. May - Planting		7	85%
9	Riparian	Poor, 3/10 to Medium, 5/10	Replanting. Pittosporum, Wandering Trad, Ivy,		April - Poison pitto along Wallaby Walk	August - Clear new path. Target: Pittosporum, Boneseed, Pampas grass	August - Indigenous Design follow-up works funded by Melb Water Grant. Along Wallaby Walk from Hill Track end. Pittos:- small - cut, poisoned and dropped; medium - cut, poisoned & chipped; large - drilled and filled.		3-7	30%
10	Dry to Moist forest	Average, 5/10	Replanting. Pittosporum, boneseed, blackberry, panic veldt			June - Target: Sallow Wattle, Pittosporum, Blackberry, Spanish Heath, Boneseed		July - Follow up relatively good area. Swept through before morning tea! Pittos, Boneseed, Blackberry. Looking good.	6-9	90%

Work Area	Vegetation Type	Initial Quality of Area	Priorities, major weed threats	2006	2007	2008	2009	2010	Quality score	% completed
11	Dry to Moist forest	Slopes - Poor, 3/10. Riparian Medium, 5/10	Replanting. Weeds spread from quarry, hemlock, ivy, blue periwinkle, kikuyu. Wandering trad, ivy, panic veldt,		June - Poison/remove Agapanthus. Poison Angled Onion near creek. August - Poison hawthorn, pitto, desert ash below quarry	February - Owl triangle, Target: Pittosporum, Hawthorn, Desert Ash, Spanish Heath, Ivy, Blackberry		July - After Morning Tea, removed Boneseed, Pittos, Ivy, Spanish Heath. November - Removed Agapanthus, Angled Onion, Cape Ivy, Briar Rose, Pittos, Hawthorn & Boneseed. Pretty good.	3-8.5	50%
12	Dry to Moist forest, wetlands	Poor 3/10, to Medium	Blackberry, pittosporum, hawthorn, fruit trees, fleabane, pasture grasses,					February - Drilled and filled Hawthorn & Pittos near Archery Club. Removed thousands of Fleabane, Boneseed and Thistles.	5-8	30%
13	Old quarry site	Derelict, 1/10	Kikuyu, Blue Periwinkle, ivy, Cape Ivy, Tree tobacco, Desert Ash, Cape Wattle, Hemlock, Sycamore Maple etc						1	5%

Scores: 1 - Derelict, 2 - Very Poor, 3 - Poor, 4 - Fair, 5 - Average, 6 - Above Average, 7 - Good, 8 - Very Good, 9 - Excellent, 10 - Pristine
